Mobile: +91 9395870223

SKILLS

Languages: Python, HTML, CSS, C, C++, Java, Linux

Tools/Platforms: React(Next.js), TypeScript, Tailwind CSS, PostgreSQL, Git/GitHub, Vercel, Docker

Soft Skills: Problem-Solving, Team Player, Adaptability

PROJECTS

Signal – AI Voice Assistant | Next.js, TypeScript, Web Speech API, NLP

Aug' 2026

- Developed Signal, a voice assistant web app in Next.js (TypeScript, Tailwind CSS), using the Web Speech API for real-time speech-to-text and browser SpeechSynthesis for voice replies.
- Engineered a custom NLP intent-matching engine using bag-of-words and cosine similarity over a hand-authored dataset of **11 intents and 55 example phrases**, enabling reliable routing of user commands to **10 action types** including web search, YouTube, Maps, and live weather via Open-Meteo.
- Implemented a live audio-reactive waveform visualizer using the Web Audio API, and delivered the project as an LPU Summer Training/Internship deliverable with a full internship report and presentation.

Melodia – Music Streaming Platform | Next.js, TypeScript, PostgreSQL, Clerk

Jul' 2026

- Built and deployed Melodia, a full-stack music streaming web app using Next.js, TypeScript, Tailwind CSS, and Clerk authentication, powered by the YouTube Data API v3 and IFrame Player API for search and playback.
- Migrated storage from local JSON files to Neon serverless PostgreSQL with Drizzle ORM (**4-table relational schema**) to work around Vercel's read-only filesystem, and developed playlists, a like/favorite system, and lyrics with a three-tier fallback (user-contributed, IrcLib, Musixmatch) across **4 REST API routes**.
- Owned end-to-end UI/UX — user flows, layout, and visual design — for a glassmorphic, bento-grid interface with a component-based architecture spanning **9 reusable components and 8 pages**, using Context API for state management, with a mini equalizer animation and ambient glow effects, and resolved Vercel deployment issues including a nested git submodule and framework preset misconfiguration.

TRAINING

Xebia IT Architects

Jul' 2026

- Utilized AI coding agents (e.g. Claude, Antigravity) across a full development workflow, diagnosing issues and prompt-engineering precise, ready-to-paste instructions for implementation.
- Applied this training by independently building and deploying Melodia, a full-stack music streaming platform, putting the AI-assisted workflow into practice.

CERTIFICATES

- Database Management System Part -1
 - Artificial Intelligence: From Basic to Agentic AI (LPU CPE, Grade A)
 - C Programming with Proctored Exam
 - Fundamentals of Software Testing
 - Linux Commands and Shell Scripting
- Aug' 2026

Jul' 2026

Jan' 2025
